SUMMARY

Product Designer with 6 years of experience in fintech and B2B SaaS. I lead end-to-end design, from customer research and problem discovery to shipping and measuring product impact.

WORK EXPERIENCE

Knit (Knit API Pvt. Ltd.)

Product Designer *Apr 2024 - Present*

- Took Knit's web app from product docs to a live product in about a month with the founders and five engineers, shipping the flows crucial for launch first and improving them from customer calls, support chats and Heap data. Knit went on to win paying customers and reach profitability
- Redesigned the developer onboarding experience for Knit’s Unified API, reducing page bounce rate from 46% to 30% and enabling 88% of users who test the API to complete onboarding
- Redesigned Data Syncs so developers can find failing records themselves (Mar 2026), replacing a flat record table with a drill-down flow. Sessions moving from a sync job to its runs rose from 28.7% to 39.9%, about 1 in 4 now drill down to the failing record, and Knit markets this visibility against competitors
- Designed Knit's white-labelled authorization UI (embedded in 20+ SaaS products), app management, alert management and data validation
- Unified three products - Unified API, MCP, and AI Agent into a single platform by auditing and consolidating their onboarding flows, interfaces and design systems into one consistent experience
- Designed an AI-powered workflow that lets clients create custom connectors for unsupported apps in minutes instead of a week.

Superbeings (Haptivity Technologies Pvt. Ltd.)

Product Designer *Aug 2022 - Apr 2024*

- Redesigned the performance review process, making it easier for managers to set up review cycles, collect feedback, and complete evaluations
- Simplified employee engagement surveys and goal-setting (OKRs), making them easier to create, manage, and track

KFin Technologies Pvt. Ltd.

Project Lead *Jun 2020 - Aug 2022*

- Designed DIGIX, turning compliance reporting into a self-serve product. Asset management companies use it to schedule, generate and share statutory and daily reports without writing code.

EDUCATION

BITS Pilani, Hyderabad Campus **Hyderabad, India**

BE (Hons) Electrical and Electronics Engineering and MSc (Hons) Chemistry *Graduation Date: Jan 2020*

SKILLS & INTERESTS
